

Artificial intelligence & Ethics

Project: AI-GREENER

Project Reference: 2024-1-AT01-KA220-SCH-000248327

Location: "Lyuben Karavelov" Secondary school, Dobrich, Bulgaria

Date: 28.10.2025

Target group: Teachers

Program

STEP 1: Understanding AI - What it is and how it works

- Build a foundational understanding of artificial intelligence

Task: Identify AI systems you interact with daily

STEP 2: Core ethical principals in AI

- Understand the ethical values that guide responsible AI use

Discussion: Why AI should be fair, safe, and transparent.

STEP 3: How AI affects society

- Examine how AI affects society at large: jobs, education, and business

Discussion: Share one positive and one negative effect of AI on society.

STEP 4: Using AI Responsibly

- Learn practical steps to ensure ethical use of AI tools.

Task: Write a short "responsible AI rule" that you would follow.
